

Making Blackboard Courses Available in Blackboard Learn 9

Please remember that in order for your students to see your course in Blackboard, you must make the course available. All courses are set as unavailable by default and will not be seen by students unless this change is made.

Option 1:

1. Choose the course you want to make available on the My Courses area
2. Choose “**Customization**” from the Control Panel on the left side of your course window
3. This will expand the Customization options. Choose “**Properties**” from the list.
4. Scroll down to the **Set Availability** section
5. Select “**Yes**” – Make the Course Available
6. Scroll to the bottom of the page and select “**Submit**” to make your course available. Students should now see your course listed in their My Courses section.

Option 2:

1. From your **My Blackboard** page you should see the **Tools** module.
2. Click on **Qwickly**
3. From here expand **Course Availability**
4. Toggle the switch for which course you want to turn **On or Off**
