Use the Ribbon

When you first start some of the programs in 2007 Microsoft Office system, you may be surprised by what you see. The menus and toolbars in some programs have been replaced with the Ribbon, which is part of the Microsoft Office Fluent user interface.

The Ribbon as it appears in Microsoft Office Word 2007

The Ribbon is designed to help you quickly find the commands that you need to complete a task. Commands are organized in logical groups, which are collected together under tabs. Each tab relates to a type of activity, such as writing or laying out a page. To reduce clutter, some tabs are shown only when needed. For example, the Picture Tools tab is shown only when a picture is selected.

Minimize the Ribbon
The Ribbon is designed to help you quickly find the commands that you need to complete a task. Commands are organized in logical groups that are collected together under tabs. Each tab relates to a type of activity, such as writing or laying out a page. To reduce screen clutter, some tabs are shown only when they are needed.

There is no way to delete or replace the Ribbon with the toolbars and menus from the earlier versions of Microsoft Office. However, you can minimize the Ribbon to make more space available on your screen.

Always keep the Ribbon minimized

1. Click **Customize Quick Access Toolbar**.
2. In the list, click **Minimize the Ribbon**.
3. To use the Ribbon while it is minimized, click the tab you want to use, and then click the option or command you want to use.
   
   For example, with the Ribbon minimized, you can select text in your Microsoft Office Word document, click the **Home** tab, and then in the **Font** group, click the size of the text you want. After you click the text size you want, the Ribbon goes back to being minimized.

Keep the Ribbon minimized for a short time

- To quickly minimize the Ribbon, double-click the name of the active tab. Double-click a tab again to restore the Ribbon.

  **Keyboard shortcut**  To minimize or restore the Ribbon, press CTRL+F1.

Restore the Ribbon

1. Click **Customize Quick Access Toolbar**.
2. In the list, click **Minimize the Ribbon**.

  **Keyboard shortcut**  To minimize or restore the Ribbon, press CTRL+F1.

**TIP**  You can still use the keyboard shortcuts while the Ribbon is minimized. For more information about keyboard shortcuts, see **Use the keyboard to work with Ribbon programs**.
