

Respondus

Respondus is a tool for creating and managing exams that can be printed to paper or published directly to Blackboard and other learning management systems.

Respondus can be used to:

- import exams created offline using a familiar Windows environment into Blackboard
- access and import test banks and pools from publishers
- move exams from one Blackboard course to another
- pull exams with or without answer keys out of Blackboard into a document to save or print
- convert exams to a format which can be uploaded into Turning Technologies clicker software for self-paced polling

NOTE: The Center for Instructional Innovation also provides the service of using Respondus to do these tasks for faculty members who ask.

Check for Updates: Make sure your version of Respondus is up to date by using the Check for Update tool. Select the “Check for Update” option from the Help pull-down menu (you will need a live Internet connection). Respondus will instantly return a message indicating whether an upgrade is available.
